CONFIDENTIAL

Log Note - Chief, Okinawa Bureau - 23 November 1971

REVERSION/TCNS -- I called Col. John Meads, Director, RCG, to ask if there had been any new developments about post-Reversion TCN treatment. He said no, and agreed that whatever military procedures for TCNs had been worked out in Japan over the years could safely be assumed to apply down here. He said he could raise this question at the next Okinawa Coordination meeting, 16 December, but I said that as far as FBIS was concerned, he need not; we would lay low and wait for the Japanese to initiate action. He will tell me, however, if anything appears to be in the wind. (Reversion file, C/Ops)
